

Create a virtual Hard Disk and allocate the storage using VM ware workstation.

AIM :-

TO create a virtual hard disk using VM ware workstation pro.

PROCEDURE :-

* Open VMware workstation pro and select the virtual machine you want to create the virtual hard disk for.

* click on the edit VM settings (open) option.

* In the VM settings window, click on Add.

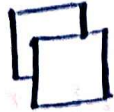

* Select the DISK and click Next.

* choose whether to create a new virtual disk or use an existing one, and click next.

* Select the disk type (either SCSI or IDE) and click Next.

- * Choose the disk space or just a certain amount and click next.
- * Choose the disk file location and name, and click next.
- * Review the settings and click finish.

Output :-

Bhavani A.

Devices .

memory : 7.2 GB .

processor : 2

Hard Disk : 4 GB .

Hard Disk (NVMe) : 2 GB .

Network Adapter : NAT .

powered off .

Hardware compatibility .

primary IP address .

Virtual Machine Details .

Result :-

using VMware Workstation Pro, we successfully created the virtual hard disk and allocate the storage for virtual machine.
