Create a cloning of a VM and test by loading the previous version

Aim:-
- To create a cloning of a VM and test it by loading the previous version / cloned VM.

PROCEDURE:-

Open VM Virtual Box manager and select the virtual machine to clone from the list of the left.

click on the 'clone' button in the top menu right-click on the VM and select 'clone' from content menu.

In the clone VM dialogue box, enter a name for the cloned virtual machine in the 'Name' field.

choose the 'full clone' option to create a completely independent clone of the VM.

* choose the location where to store the cloned VM in the 'path' field.

* Select the Virtual hard disk type to use for the cloned VM in the Virtual Hard Disk' selection.

* click on the 'clone' button to start the cloning process.

* Once the cloning process is complete, you can start the cloned VM.

output:-

 clone of ~~B~~ Bhavani

Device
memory: 2GB
processor: 2
Hard disk: 20GB
CD/DVD: Auto detect.
